(54) Title: METHOD FOR CONVERTING VENOUS BLOOD VALUES TO ARTERIAL BLOOD VALUES, SYSTEM FOR UTILISING SAID METHOD AND DEVICES FOR SUCH SYSTEM

(57) Abstract: The invention relates to methods of converting venous blood values to arterial blood values. This has the advantage that arterial blood samples need not be taken, and the disadvantages compared to venous blood samples when taking arterial blood samples are eliminated. The method is basically based on three steps, namely the step of measuring arterial oxygenation, the step of measuring and estimating values of venous blood acid/base status and oxygenation status of a venous

blood sample, and the step of converting the venous blood values by applying a mathematical model for deriving blood acid/base status and oxygenation status into estimated arterial blood values.

WO 2004/010861 A2

## INTERNATIONAL SEARCH REPORT

International Application No

PCT/DK 03/00512

## A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 A61B5/145 G01N33/49

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 A61B G01N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, MEDLINE, BIOSIS, INSPEC

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
P,A	US 2002/120185 A1 (JOHNSON ROYCE) 29 August 2002 (2002-08-29) abstract; figures 1-3 ---	1-25
A	US 6 206 830 B1 (KIANI-AZARBAYJANY ESMAIL ET AL) 27 March 2001 (2001-03-27) the whole document ---	1-25
A	US 6 163 715 A (REUSS JAMES L ET AL) 19 December 2000 (2000-12-19) abstract; figures 1,2 ---	1-25

☒ Further documents are listed in the continuation of box C.☒ Patent family members are listed in annex.

## \* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

## INTERNATIONAL SEARCH REPORT

International application No.  
PCT/DK 03/00512

### Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos.: 1-17  
because they relate to subject matter not required to be searched by this Authority, namely:  
see FURTHER INFORMATION sheet PCT/ISA/210
2. ☐ Claims Nos.:  
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

### Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  
1-25

#### Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.  
☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.1

Claims Nos.: 1-17

Claims 1-17 relate to a diagnostic method practised on the human body, in this case a method for blood evaluation useful for treatment of ill patients. Thus, the International Search Authority is not required to carry out an international search for these claims (PCT Rule 39.1(iv)). Nevertheless, a search has been executed for claims 1-17 based on the described system in claims 18-25.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-25

A method and system for estimating/calculating arterial blood values from a venous blood sample, claims 1-25.

2. Claims: 26-30

A device for anaerobic drawing of venous blood reducing residual gases in the blood sample claims 26-30.
